Communication

MAY 2005

EXPERIENCE HIGHLIGHTS

Google

UX designer SEPTEMBER 2024 - JUNE 2025 (CONTRACT)

Designed and launched new AI-enabled features for BetterBug, a tool used by all Google devs for bug reporting. The features streamlined the process and reduced duplicate reports, resulting in a savings of over 16k developer-hours in the first 100 days.

Trupanion

senior UX designer/B2B product design lead NOV 2021 - JUN 2023

Led web and mobile design on B2B and 2-sided marketplace projects in the veterinary space including building out a design team, research practices and UI library. Redesigned flagship B2B product resulting in 16.9% lead growth and 30% increase in users on golden path.

Starbucks

senior ui/ux designer JAN 2020 - JULY 2021

Embedded designer on an engineering team focused on mobile apps for in-store inventory. Developed app-enabled solutions that allowed 60% faster inventory operations and improved engagement and adoption by in-store partners.

Leafly

product designer I/II SEPT. 2017 - JUNE 2019

Redesigned B2C menu and checkout experience resulting in substantially increased user engagement. Later led design for all B2B software products including a new store management system that substantially improved data quality and B2B customer engagement.

Bitcount

ui/ux designer JULY 2013 - AUG. 2016

Product design at a mobile app startup focused on tools for musicians. Designed multiple iOS/Android apps including Apple's top-selling instrument tuner of all time. (>3m copies)

PRIMARY TOOLSET

- Figma + Figjam
- Photoshop, Illustrator, & InDesign
- HTML/CSS/ES6 JS
- Git (command line)
- Jira + Azure DevOps
- Miro, Notion, SharePoint

BONUS SKILLS

- Writing, interviewing and presenting (former journalist)
- Photography and videography

EXCITED ABOUT

- Empathy-forward design
- Finding and sharing new insights about users and teams
- Solid-gold consent practices in digital products, especially AI implementations.
